I also served as a Teaching Assistant for **250+ students**, strengthening my ability to **deliver training and workshops** on complex analytical topics.

Cross-Functional Collaboration and Feedback Loops

The role requires close collaboration with Product, Engineering, and **Go-to-Market teams**. I have a proven **collaborative mindset**, having led product development for a new SaaS vertical by gathering user insights, mapping processes, and working directly with engineering to ensure a smooth rollout. I am adept at managing feedback loops, from **qualitative and quantitative** research to **triaging bugs** and prioritizing feature requests.

Data-Driven and Tech-Savvy Mindset

The ideal candidate has **analytical thinking** skills and a **tech-savvy attitude**. My background includes building advanced **Excel** models, **n8n** automations, using BI dashboards, and leveraging **AI** (specifically Agentic AI) to develop new product flows.
